ABOUT “PORCINE RESEARCH”

Porcine Research is a peer-reviewed journal. Each published article was independently seen before by two scientific reviewers and at least one linguist. The journal covers all the fields of porcine research (structure, function, evolution, ecology, taxonomy) and swine husbandry (applied biology, legislation, meat production technology, or biotechnology).

Porcine Research is a good opportunity for you to publish your original research, review, opinion, essay or short communication, both printed and online, color, open access. The journal will be disseminated on a very large scale with the help of various international databases. Peer-review policy: single blind peer-review is used.

CABI is a not-for-profit international organization that improves people's lives by providing information and applying scientific expertise to solve problems in agriculture and the environment. Their mission and direction is influenced by their member countries who help guide the activities they undertake. These include scientific publishing, development projects and research, and microbial services.

2010 marked 100 years of CABI. Since its beginnings as an entomological committee in 1910, it then developed into a Commonwealth organization before becoming a truly international service in agricultural information, pest identification and biological control in the mid 1980s.
